

EVAN WALLACE LUSKY

Senior Software Engineer | Platform Systems and AI Enablement

Nashville, Tennessee • 443-876-7303 • ewlusky@gmail.com
evanwallacelusky.com • github.com/ewlusky • linkedin.com/in/evan-lusky

Senior software engineer with seven years of client-facing delivery across nine engagements. Builds reliable systems at the seams between applications, cloud infrastructure, documentation, and people. Experience spans regulated healthcare, fintech, insurance, field operations, platform modernization, and AI-enabled developer workflows.

TECHNICAL SKILLS

Platform and cloud: AWS ECS Fargate, Aurora, Secrets Manager, Terraform, Docker, Azure, CI/CD

Backend and data: C#.NET, Java, Spring Boot, Node.js, REST APIs, PostgreSQL, SQL Server, MongoDB

Frontend and quality: TypeScript, Angular, React, Vue.js, PWA, Cypress, xUnit, Vitest

AI and regulated systems: Claude, MCP, LiteLLM, subagents, guardrails, OpenAPI, FHIR/TEFCA, HIPAA-regulated delivery

PROFESSIONAL EXPERIENCE

FortyAU | Senior Full-Stack Software Engineer

Nashville, Tennessee | November 2018 to July 2026

- Delivered client-facing software across nine engagements, repeatedly backfilling senior engineers on short notice while maintaining direct delivery across unfamiliar codebases.
- Built a TEFCA clinical-data integration end to end for a Medicare care-coordination platform, with a swappable mock provider, PHI-safe error design, audit logging, and fail-fast configuration validation.
- Diagnosed a staging failure across application code, Terraform, ECS task definitions, and AWS Secrets Manager, then added deploy-time validation for that failure class.
- Built custom subagents, HIPAA guardrails, code-review workflows, and a self-updating engineering wiki for a regulated delivery team.
- Led a ground-up fintech rebuild, reverse-engineering undocumented business logic and integrating Adobe, Power BI, Microsoft 365, and SharePoint.
- Built an Angular 17 front end for an offline-first .NET field-work platform using service workers, complex AG Grid workflows, and Cypress coverage.
- Modernized healthcare and insurance systems with Angular, Java Spring Boot, C#.NET, React, PostgreSQL, and SQL Server.

ADDITIONAL EXPERIENCE

United States Navy | Cryptologic Technician Interpretive, CTI2 (E-5)

2009 to 2015 | Six years of honorable service

- Graduated top of class in Mandarin Chinese at the Defense Language Institute and earned the Provost Award and Martin J. Kellogg Award.
- Led a joint-service team on advanced collection systems and rewrote its training programs for a multi-branch audience.

SELECTED PROJECTS

Idiolect | NLP evaluation and research

Built a 13-register style model from a roughly 134,000-word personal corpus. A blind A/B harness measured 81 percent detectability against a 60 percent target, and the negative result was published instead of buried.

Doodle Dictionary | Computer-vision pipeline

Built tooling for a printable visual dictionary, including 31,500 vision-model verdicts, 5,274 extracted crops, and 1,232 classes.

Brickomancy and WorldWizard | Shipped family games

Designed two playable systems around explicit constraints, clear rules, collaborative imagination, and rapid iteration.

Personal multi-agent operations system

Built an Obsidian-based life and project environment operated through AI agents, with scheduled tasks, shared-memory conventions, parallel research, and adversarial review passes.

UNDERGRADUATE RESEARCH

University of Colorado Boulder

Supported behavioral-neuroscience research on reward learning in the Saddoris Lab. Built and presented a sign-tracking model in Emergent and contributed to computational cognitive-neuroscience work in the O'Reilly lab.

EDUCATION AND CREDENTIALS

University of Colorado Boulder

B.S. Computer Science, AI focus | Additional study and undergraduate research in neuroscience | Certificate in Cognitive Science

Defense Language Institute

A.A. Chinese, Mandarin | Top of class with Provost and Martin J. Kellogg awards

Nashville Software School

Full-Stack Web Development Certificate

Anthropic

Claude Certified Architect, Professional, July 2026 | Anthropic Foundations, July 2026

LANGUAGES

English, native | Mandarin Chinese, DLI-trained
